Research Interests/Problems
Chun-Hung Chen, George Mason University

- **Optimal Computing Budget Allocation (OCBA) for**
  - **Ranking and Selection**
  - **Simulation Optimization**

- **Goal of OCBA**
  - **To allocate the simulation budget in a most efficient way for optimization problem so that a good design can be found efficiently**

- **OCBA for different problems/settings**
  - **Selecting the best**
  - **Selecting an optimal subset of top-m designs**
  - **Optimization with constraints**
  - **With underlining regression model**
  - **Large search space**
